

The True Cost of Paper-Based Aircraft Records BY THE NUMBERS

Protect Aircraft Value

Loss of **\$100k – \$1M** in aircraft value due to lost or damaged paper records.

*Range calculated on **avg 30%** decrease for a piston and a light jet

Protect your assets by **digitizing aircraft records** so you have a back-to-birth history and timeline of all maintenance and inspections.

Access and Collaborate from Anywhere

Piece-meal records at multiple locations make it difficult to locate and share with those within (pilots, owners) and outside your organization (MROs, etc.)

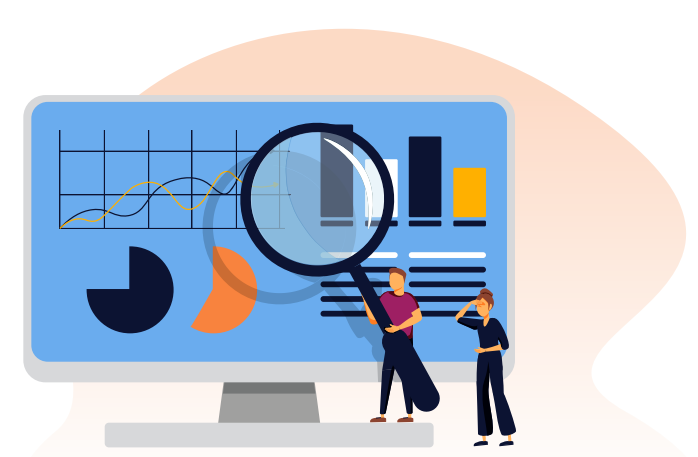

360° visibility of every record, shareable and accessible from any device.

Index and Search Across All Records

4 hours/aircraft/month devoted to searching for aircraft records at \$75/hour.

A huge impact to operations, when each year costs **~\$3,600**

Digitized records are fully indexed and searchable, so productivity increases and you can grow your operations more profitably!

Minimize Costly Research

FAA conformities and resolution of report discrepancies are time-intensive. Switching to a modern aircraft records platform speeds resolution and boosts productivity.

From **5 weeks to 5 days** reduction in time resolving report discrepancies.

Reducing research adds up to **\$20k-\$100k** in revenue!

Enjoy Peace of Mind

Countless stress and anxiety-filled days just trying to stay organized and in compliance.

Priceless peaceful night's sleep knowing your records are secured and your operations are running smoothly.
